

We believe **everyone** deserves excellence in education and training

Education and Training Boards are Ireland's leading state providers of Primary, Secondary and Further Education and Training as well as Youth Services. ETBs provide a place to learn across every town, city, county (and constituency!) for over 370,000 learners.

We want everyone – politicians, stakeholders and policy makers- to be aware of, and support our objectives for improving education and training in Ireland:

1. Increase the number of Community National Schools so that all parents have access to multi-denominational primary schools in their communities for their children.
2. Increase the number of Deputy Principals in our disadvantaged schools so that they can spend more time supporting students, their families and the broader education community to deliver better outcomes for our children.
3. Increase funding for Further Education & Training so that all learners can develop the skills they (and the country) need in their own communities.
4. Invest in the essential youth work services ETBs provide to at-risk young people so they can flourish.
